SYDNEY INTERNATIONAL EXHIBITION.

It may not be generally known that there is a post and telegraph office within the Garden Palace, and that the same facilities for receiving and posting letters, or sending telegrams, exist there as in any other portion of the city. Mails are delivered there at 9.15 a.m., 1 p.m., and 4.15 p.m. daily, and dispatched at 12.30 p.m., 3.10 p.m., and 5 p.m.

We understand that the Executive Commission (Mr. P. A. Jennings, C.M.G.), has received a telegram from Sir Daniel Cooper informing him that the Government of the Dominion of Canada has appointed a commission to represent that country at the Exhibition.

Notice has already been taken of the pocket handkerchief-like flags which are exhibited on the Garden Palace, and our attention has been called to the fact that there is not a single large flag of England or Australia unfurled on the exterior of the building. Very creditable samples of the flags of the United States, France, and other countries are displayed, and the cosmopolitan spirit which seems to imply is not doubt very admirable; but there are those who think that the old country ought not to be snuffed out in ignominious, and who would be willing to lend a few yards of bunting rather than that she should not be represented. Our attention has also been called to the fact that the New South Wales Court is about the only colonial court in which there has been no concerted attempt at decoration.

Work at the Art gallery is proceeding very satisfactorily, and it is expected that the building will be completed in about a month from the present time.

Mr. Jones, of George-street, is engaged upon the production of the gold, silver, and bronze medals to be awarded at the Exhibition.

Yesterday morning his Excellency the Marquis of Normanby (Governor of Victoria), and his Excellency Governor Ward of Tasmania, accompanied by the Hon. Samuel C. M. G., Lord Hertford Phipps, and Captain Macfarlane visited the Exhibition. They were received at the western entrance by the Executive Commissioners (Mr. P. A. Jennings, C.M.G.), and proceeded to inspect the galleries. They spent some time in the examination of the telegraphic instruments shown by the Postmaster-General's Department, and these were explained to them by Mr. F. C. Cricknell, the Superintendent of Telegraphs. The instruments shown were, first, that of Cooke and Wheatstone, which is said to be the first instrument used on a public line in England, and to have transmitted the message which led to the arrest of the murderer Tawell; the circumstances attending which event were in many respects so remarkable as to have become historical. This was superseded by the single needle instrument of Highley, patented in 1843, and in its turn gave place to Henry's magnetic telegraph. Following these instruments which operated through visual signals, is the well-known Morse instrument, as modified and improved by Siemens and Halske. Among the other instruments shown were, and the peculiarities of which were explanatory, the vice-regal pair, were Wheatstone's and Siemens' magneto-electric alphabetical telegraph, Siemens' automatic cylinder transmitter, the New York and stock exchange instruments, which, together with Philip's apparatus, are both type-writing instruments. Finally, their Excellencies were shown Wheatstone's automatic instruments, and the quadruplex system of telegraphy.

We believe that the only exhibit from Ireland is that shown by the celebrated linen thread manufacturers, Messrs. William Barbour and Sons, of Liverpool. A more complete collection of every kind of linen thread in every endless variety of colour it is difficult to imagine, and threads for shoemakers, tailors, saddlers, bookbinders, gloves, upholsterers for sofas, and wash machines, &c., are all shown, nicely wound in colours, which will certainly please the most fastidious, for first-rate quality of material and finish will be given to the firm's fame for the best of good in the trade in Ireland.

Specimens of the raw silk dressed, and the worms from which the threads are spun, are also exhibited. We are informed that the Messrs. Barbour's thread works in Ireland and America give employment to over four thousand hands.

The following is a statement showing the amount of space allotted in the machinery halls:—Sections A and B, Section A, available space, 48,000 superficial feet; Victoria, 4,000; America, 4,000 superficial feet; France, 2,000; Germany, 3,000; South Australia, 2,000; Belgium, 248; New South Wales, 2,490; Canada, 2,400; Great Britain, 35,022; total superficial feet allowed, 48,000. Section B, Victoria, 8,000 superficial feet; America, 4,480; Germany, 4,000; New South Wales, 2,248; Great Britain, 21,752; Canada, 5,520; total, 45,900; space allotted, 2100—43,000. The total quantity of space allotted in London on floor, 55,042 feet; total granted here, 56,774; wall space allotted, 2764; Summary of space granted both halls:—Total space, 93,000 superficial feet. Victoria, 8,000; America, 4,000 superficial feet; France, 2,000; Germany, 3,000; South Australia, 2,000; Belgium, 248; New South Wales, 2,490; Canada, 2,400; Great Britain, 35,022; total superficial feet allowed, 48,000. Section B, Victoria, 8,000 superficial feet; America, 4,480; Germany, 4,000; New South Wales, 2,248; Great Britain, 21,752; Canada, 5,520; total, 45,900; space allotted, 2100—43,000. The total quantity of space allotted in London on floor, 55,042 feet; total granted here, 56,774; wall space allotted, 2764; Summary of space granted both halls:—Total space, 93,000 superficial feet. Victoria, 8,000; America, 4,000 superficial feet; France, 2,000; Germany, 3,000; South Australia, 2,000; Belgium, 248; New South Wales, 2,490; Canada, 2,400; Great Britain, 35,022; total superficial feet allowed, 48,000. Section B, Victoria, 8,000 superficial feet; America, 4,480; Germany, 4,000; New South Wales, 2,248; Great Britain, 21,752; Canada, 5,520; total, 45,900; space allotted, 2100—43,000. The total quantity of space allotted in London on floor, 55,042 feet; total granted here, 56,774; wall space allotted, 2764; Summary of space granted both halls:—Total space, 93,000 superficial feet. Victoria, 8,000; America, 4,000 superficial feet; France, 2,000; Germany, 3,000; South Australia, 2,000; Belgium, 248; New South Wales, 2,490; Canada, 2,400; Great Britain, 35,022; total superficial feet allowed, 48,000. Section B, Victoria, 8,000 superficial feet; America, 4,480; Germany, 4,000; New South Wales, 2,248; Great Britain, 21,752; Canada, 5,520; total, 45,900; space allotted, 2100—43,000. The total quantity of space allotted in London on floor, 55,042 feet; total granted here, 56,774; wall space allotted, 2764; Summary of space granted both halls:—Total space, 93,000 superficial feet. Victoria, 8,000; America, 4,000 superficial feet; France, 2,000; Germany, 3,000; South Australia, 2,000; Belgium, 248; New South Wales, 2,490; Canada, 2,400; Great Britain, 35,022; total superficial feet allowed, 48,000. Section B, Victoria, 8,000 superficial feet; America, 4,480; Germany, 4,000; New South Wales, 2,248; Great Britain, 21,752; Canada, 5,520; total, 45,900; space allotted, 2100—43,000. The total quantity of space allotted in London on floor, 55,042 feet; total granted here, 56,774; wall space allotted, 2764; Summary of space granted both halls:—Total space, 93,000 superficial feet. Victoria, 8,000; America, 4,000 superficial feet; France, 2,000; Germany, 3,000; South Australia, 2,000; Belgium, 248; New South Wales, 2,490; Canada, 2,400; Great Britain, 35,022; total superficial feet allowed, 48,000. Section B, Victoria, 8,000 superficial feet; America, 4,480; Germany, 4,000; New South Wales, 2,248; Great Britain, 21,752; Canada, 5,520; total, 45,900; space allotted, 2100—43,000. able guardian, and the sooner it can be safely returned to its scabbard the better is it both for the victors and the vanquished.

NEWS OF THE DAY.

This cable is still working satisfactorily, and we have received by its means several important messages which we publish elsewhere. Not long since we were told that the two eldest sons of the Prince of Wales—Prince Albert Victor and Prince George, aged respectively 15 and 16 years—were preparing for a tour round the world, and that they would visit the Sydney Exhibition. We now learn that they have started on their voyage in H. M. S. *Bacchante*. With regard to the Afghan rebellion, the Ameer would appear, from latest advice, to be very anxious to retain the friendship of the British. His embassy has arrived at General Roberts' headquarters, and a full explanation will, no doubt, be given as to the cause of the late rebellion. But, at present simultaneously with the Ameer's friendly assurances come reports of a mutiny of troops at Herat, and the massacre by them of the military and civil authorities. Herat is a fortified city of Western Afghanistan, and is a place of great military importance as occupying the gate into India from the north. Prince Bismarck's visit to Vienna is still giving rise to a large amount of gossip, as such an event is sure to do, and it was this circumstance probably that gave colouring to the talk about strained relations between Germany and Russia, and the rumoured Austro-German alliance. It will be noticed that the rumour about the Emperor Alexander's death is not confirmed. Our commercial telegrams from London confirm a slight rise in breadstuffs, and a further decline in the price of tin.

The Pacific Mail Company's steamship *Australia*, with the English mails via San Francisco, arrived at Auckland yesterday evening, one day in advance of contract time. She should reach Sydney on Sunday afternoon.

Among the passengers by the steamship *Gunga*, which arrived from Leveka last night, is His Excellency the Lieutenant-Governor of Fiji, Mr. G. W. Des Voeux, also Mrs. Des Voeux, family, and suite. The *Gunga* brings 150 packages for the Exhibition.

The Marquis of Normanby, Governor of Victoria, and Governor Weld, of Tasmania, and their wives, left Sydney yesterday by the A. S. N. Co.'s steamship *City of Adelaide* for Melbourne. In the vicinity of the Government jetty, from whence the Government barge conveyed their Excellencies to the City of Adelaide, a large crowd of spectators had congregated.

But far by the greatest number of people numbered on the A. S. N. Co.'s wharf, in expectation of witnessing the final embarkation from that point, but in this they were disappointed. The City of Adelaide proceeded on her voyage directly the *vis-à-vis* party was on board.

His Excellency Sir William Jervois, Governor of South Australia, Lady Jervois, and suite, leave Sydney by the E. and A. M. Co.'s steamer *Brisbane*, this morning, for Melbourne.

Messrs. Bristow, Brothers, and Co. inform us that they leave by cable, from Singapore, that the Bowen (a) left that port on the 13th instant, and will arrive for Sydney, two days in advance of contract time.

It becomes more and more apparent every day, that from an educational point of view the International Exhibition is going to be a great success. During the first two or three days following the opening visitors appeared to spend their time in trying to see everything that could be seen. It was a futile attempt, and most people who made it must have left the *Pala* with very ill-defined ideas of the vastness of the display, and of the multiplicity of objects to be seen.

It requires many visits to form a proper conception of the magnitude and character of the Exhibition. As for the exhibits themselves, they demand, for the most part, the closest scrutiny.

Glancing at them haphazard, and fails altogether to instruct.

To take one of the courts for example—the Home Court. In this are to be seen innumerable works of art—sculptures, paintings, mosaic work, wood carving, fruit modelling, in fact art works in endless variety.

Many of the visitors regard these with an intelligent eye. But very many may be seen looking over them in a merely cursory manner. To them the inlaid work passes for painting of ordinary, or less than ordinary, merit. Tell them that the flowers and figures on the tables, or in the picture frames, are made of inlaid stone, the pieces and colours being so beautifully combined as to produce the effect of excellent painting, and the articles become immediately invested with a new interest. And then, everything is declared to be beautiful, wonderful! Many persons have exhibited a singular, though perhaps pardonable ignorance also in regard to the sculptures shown in this same court, and many curious instances of this might be related. For example, there is the bust of Othello, who holds the fatal pocket handkerchief in his hand. The figure is in bronze, the drapery being represented in white marble. So cleverly has the marble been sculptured that it appears like a solid ball round Othello's head and shoulders. It is quite common to see visitors handling the marble to assure themselves it is not real. One gentleman, standing amongst a group of admirers yesterday, accidentally learned what was supposed to be the secret of the work, and he exclaimed, with some amount of surprise, that he had admired the sculpture some half dozen times, but he had never dreamt that it was anything but a bronze figure, with a solid of silk over it. So throughout the Exhibition there are hundreds and thousands of exhibits which will bear and deserve close study, and it is this study, intelligently given, that will produce the good results that may be expected to flow from an exhibition of industry and art such as we have now in the heart of Sydney. Yesterday, Signor Gioria gave a pianoforte recital, and this afternoon there is to be a pianoforte and violin recital, by Signor Paolo Gioria and Signor Ercolito Otori.

The Hon. Saul Samuel, C.M.G. (the Postmaster-General), left Sydney last night for the Hunter. He will to-day formally open the Wallsend School of Art, an institution of which, it will be remembered, he was requested to lay the foundation stone some months ago, but was prevented from doing so by reason of ill health.

One of the four motors recently imported from America has been tried under steam and is found to answer admirably. We understand that it is the intention of the Commissioners for Railways to submit steam for horse traction, from the beginning of next week, when the two American cars will be brought into use. These will each seat ninety persons—sixty inside and thirty on the roof—the roof seats being sheltered by an awning.

The Full Court, yesterday, consisting of their Honors Mr. Justice Hargrave, Mr. Justice Fauret, and Sir William Manning, dismissed the Equity appeal. "The Attorney-General v. Holt and others," with costs, without calling upon the respondent's counsel. Their Honors were unanimous in holding that the Crown had been in error, and not misled by Mr. Holt; and that if the Government had been deceived it was through their own negligence in not submitting the application to their law officers, and having the title properly investigated.

The annual general meeting of the New South Wales Cricket Association will be held this evening, at Tattersall's Hotel, at 8 o'clock, to receive the annual report; to consider proposed alterations in rules, permitting the ground members to send delegates to the Association; to elect officers for the ensuing year, and to transact any other business which may be brought before the meeting. A meeting of the committee is called for 7.30 p.m., to consider report, &c.

On Monday, a case of some importance was heard at the Water Police Court, arising out of the obstruction placed on Circular Quay, near the A. S. N. Co.'s Wharf. There were cross cases of assault, and the parties were Captain Munro and Mr. Parker. The charge preferred against Captain Munro was the first investigated, and the evidence of George Parker was in effect that on Friday afternoon last he was placed in charge of a boom which had been laid on the Circular Quay by the order of Captain Bell, the manager; that Captain Munro came along leading about twenty men; that he went up to the boom and was seized by the defendant and violently shaken, at the same time he received a blow, but from whom he could not tell. While he was on the ground, after being struck, the boom was removed to the watermen's stairs. The boom on which he had been placed was divided by the installed boom into two 20-foot passages, either side, the log being laid there to prevent accidents to persons discharging cargo, whose lives would have been endangered by the traffic if the boom had not been placed there. A similar obstruction had been previously laid there but had been removed, and he had reason to believe that Captain Munro removed it. Evidence was also given by Michael Dally. The Bench decided that the defendant had acted in the exercise of a right, and that their interference, under the circumstances, was not called for. The other case was withdrawn.

The twelfth annual meeting of the Botany Mechanics' Institute was held on Monday evening; Mr. W. Stephenson presided. A letter was received from Mr. H. Westcott, president, apologizing for his unavoidable absence. The minutes of the previous meeting were read and confirmed, and the following officers for the ensuing year ending 30th September, 1880, were elected:—Mr. W. Stephenson; T. A. Smith, D. Mackie, vice-president; S. Moreton, T. Spence, S. Daniels, W. Moyes, W. Parker, A. Bray, W. H. Pastfield, J. Court, H. Westcott, committee of management; A. Bray, T. A. Smith, auditors; C. Howe, librarian and censurist. Mr. Spence moved a vote of thanks to the retiring officers for their satisfactory manner in which they had discharged the duties devolving upon them. Mr. Hadjin responded the motion, which was unanimously carried. Mr. Stephenson responded, and called upon the secretary to read the annual report, in which it was stated amongst other

for augmenting the supply of water to George and Pitt streets, Redfern. The report of the Water Committee, recommending the purchase of 212 tons of cast-iron 20-inch watermain at £61 per ton, and the report of the Finance Committee, recommending the construction of ice-chambers in the Fish Market at Woolloomooloo, were adopted. Mr. George Durham was appointed as an accountant to examine the accounts of the City Corporation in terms of the resolution of Council.

YESTERDAY afternoon, the Mayor of Sydney (Mr. C. J. Roberts) entertained, at his private residence, Chatsworth, Potts Point, between fifty and sixty gentlemen, including the city aldermen, and many of our distinguished visitors from other colonies. After lunch, which had been prepared on one of the balconies overlooking the harbour, his Worship the Mayor, in felicitous terms, proposed the usual loyal and patriotic toasts, which were heartily responded to. The toast of the Parliament was responded to by the Hon. Sir John Robertson, M.L.C., K.C.M.G., Vice-President of the Executive Council; Mr. R. B. Smith, and Mr. John Davies, and the toast relating to "our distinguished visitors," drew forth speeches eulogistic of the beauty of the surroundings of Sydney and of the graceful hospitality of the Mayor, from the Hon. W. H. Burgess (Mayor of Hobart Town), the Hon. W. J. Clarke, M.L.C., and the Hon. W. Wilson of Melbourne; Mr. O. M. Spencer, American Consul-General; Mr. Zevenboom, of the Melbourne City Council, and others. We understand that Mrs. Casey and the Hon. W. C. Smith, of Victoria, would have been present had they not been prevented by their legislative duties. The toast of "The Ladies" (mentioning prominently the name of Mrs. C. J. Roberts) who had so gracefully filled the position of Mayoral, was proposed in very felicitous terms by the Hon. Sir John Robertson, of that of his Worship the Mayor by the Hon. W. J. Clarke. Both were received with great enthusiasm. The elegance of Chatsworth and the magnificence of the surrounding scenery, formed a theme of general admiration. An efficient band was in attendance and played at intervals during the afternoon.

YESTERDAY evening, at St. Andrew's Cathedral, Rev. W. Scott, M.A., delivered the first of a series of Tuesday evening lectures, the subject being, "The Oppositions of Science falsely so-called." The congregation was very limited. After prayers, the reverend took for his text the words addressed to Timothy, giving a caution against the teachings of "science falsely so-called." He went on to point out the false doctrines of the Gnostics to which the apostle referred, and from these proceeded to refer to the modern forms of science falsely so-called. To true science resting on the basis of proved facts there could be no objection. But when a philosopher went beyond these and dogmatically or inventorially asserted the creed of the materialist, they ought to beware of his teachings. He briefly referred to Tyndall's materialistic bias, and Darwin's natural selection theory, maintaining that they were wanting in essential elements of proof. Many true men of science, such as Faraday, accepted the Christian faith; and it was chiefly men of a lower stamp who sought to ignore God in the universe. In regard to miracles such would say that they were fabulous because they were not understood, when they were doubtless fully in harmony with laws known to a higher Being controlling the laws known to man. The discoveries of astronomy and geology had simply removed incumbrances to the reception of the truth, and had in no way contradicted the teachings of revelation. There was no reason to be afraid of true science, for God was on the side of truth. And while they had no reason to fear false science they did well to regard the apostolic injunction respecting science falsely so-called, against the teachers of that the bullet was so far spent. This case will, doubtless, be a warning to those who are responsible for placing bullet-cartridge in the hands of boys. If steps are not taken to put a stop to such "indiscriminate firing," the probability is that some fatal accident will have to be recorded.

Axton's many opportunities of the present time, is the Royal Sydney Souvenir, published by Mr. Edward R. Cole, of George and King streets. This contains 24 views, nicely executed, of public buildings, streets, harbour scenery, &c. The views fold up into book form. The binding is very pretty, the souvenir is well got up, and the whole is enclosed in a protecting case.

THE BOTANY DAMS are now full—so full, indeed, that a large body of water is passing over the weir of the engine pond dam into the sea. This body of water flows in a rough-like channel 40 feet wide by a depth of 4 inches in the centre, and similar channels can only be avoided when the council constructs a couple of dams to store surplus water. The pumping dam has about twelve feet of water, and owing to the narrowness of the channel, it connects with the narrow water which required. Never, at this time of year, have the dams been so full, and never, perhaps, has it been necessary that an unusually large supply of water should be available. The machinery at Botany is more than equal to the demands on it, for the three engines two are easily able to do all the work required to supply city wants.

Never, at this time of year, have the dams been so full, and never, perhaps, has it been necessary that an unusually large supply of water should be available. The machinery at Botany is more than equal to the demands on it, for the three engines two are easily able to do all the work required to supply city wants.

The site of the Botany dam is now full, indeed, that a large body of water is passing over the weir of the engine pond dam into the sea. This body of water flows in a rough-like channel 40 feet wide by a depth of 4 inches in the centre, and similar channels can only be avoided when the council constructs a couple of dams to store surplus water. The pumping dam has about twelve feet of water, and owing to the narrowness of the channel, it connects with the narrow water which required. Never, at this time of year, have the dams been so full, and never, perhaps, has it been necessary that an unusually large supply of water should be available. The machinery at Botany is more than equal to the demands on it, for the three engines two are easily able to do all the work required to supply city wants.

From 1.30 p.m. to 4.30 p.m. 11.30 a.m. to 12 m.

From 4.30 p.m. to 7.30 p.m. 12 m. to 1.30 p.m.

From 7.30 p.m. to 10.30 p.m. 1.30 p.m. to 2 m.

From 10.30 p.m. to 12 m. 2 m. to 3 a.m.

From 12 m. to 1.30 p.m. 3 a.m. to 4.30 p.m.

From 1.30 p.m. to 2 m. 4.30 p.m. to 7.30 p.m.

From 2 m. to 3 a.m. 7.30 p.m. to 10.30 p.m.

From 3 a.m. to 4.30 p.m. 10.30 p.m. to 12 m.

From 4.30 p.m. to 7.30 p.m. 12 m. to 1.30 p.m.

From 7.30 p.m. to 10.30 p.m. 1.30 p.m. to 2 m.

From 10.30 p.m. to 12 m. 2 m. to 3 a.m.

From 12 m. to 1.30 p.m. 3 a.m. to 4.30 p.m.

From 1.30 p.m. to 2 m. 4.30 p.m. to 7.30 p.m.

From 2 m. to 3 a.m. 7.30 p.m. to 10.30 p.m.

From 3 a.m. to 4.30 p.m. 10.30 p.m. to 12 m.

From 4.30 p.m. to 7.30 p.m. 12 m. to 1.30 p.m.

From 7.30 p.m. to 10.30 p.m. 1.30 p.m. to 2 m.

From 10.30 p.m. to 12 m. 2 m. to 3 a.m.

From 12 m. to 1.30 p.m. 3 a.m. to 4.30 p.m.

From 1.30 p.m. to 2 m. 4.30 p.m. to 7.30 p.m.

From 2 m. to 3 a.m. 7.30 p.m. to 10.30 p.m.

From 3 a.m. to 4.30 p.m. 10.30 p.m. to 12 m.

From 4.30 p.m. to 7.30 p.m. 12 m. to 1.30 p.m.

From 7.30 p.m. to 10.30 p.m. 1.30 p.m. to 2 m.

From 10.30 p.m. to 12 m. 2 m. to 3 a.m.

From 12 m. to 1.30 p.m. 3 a.m. to 4.30 p.m.

From 1.30 p.m. to 2 m. 4.30 p.m. to 7.30 p.m.

From 2 m. to 3 a.m. 7.30 p.m. to 10.30 p.m.

From 3 a.m. to 4.30 p.m. 10.30 p.m. to 12 m.

From 4.30 p.m. to 7.30 p.m. 12 m. to 1.30 p.m.

From 7.30 p.m. to 10.30 p.m. 1.30 p.m. to 2 m.

From 10.30 p.m. to 12 m. 2 m. to 3 a.m.

From 12 m. to 1.30 p.m. 3 a.m. to 4.30 p.m.

From 1.30 p.m. to 2 m. 4.30 p.m. to 7.30 p.m.

From 2 m. to 3 a.m. 7.30 p.m. to 10.30 p.m.

From 3 a.m. to 4.30 p.m. 10.30 p.m. to 12 m.

From 4.30 p.m. to 7.30 p.m. 12 m. to 1.30 p.m.

From 7.30 p.m. to 10.30 p.m. 1.30 p.m. to 2 m.

From 10.30 p.m. to 12 m. 2 m. to 3 a.m.

From 12 m. to 1.30 p.m. 3 a.m. to 4.30 p.m.

From 1.30 p.m. to 2 m. 4.30 p.m. to 7.30 p.m.

From 2 m. to 3 a.m. 7.30 p.m. to 10.30 p.m.

From 3 a.m. to 4.30 p.m. 10.30 p.m. to 12 m.

From 4.30 p.m. to 7.30 p.m. 12 m. to 1.30 p.m.

From 7.30 p.m. to 10.30 p.m. 1.30 p.m. to 2 m.

From 10.30 p.m. to 12 m. 2 m. to 3 a.m.

From 12 m. to 1.30 p.m. 3 a.m. to 4.30 p.m.

From 1.30 p.m. to 2 m. 4.30 p.m. to 7.30 p.m.

From 2 m. to 3 a.m. 7.30 p.m. to 10.30 p.m.

From 3 a.m. to 4.30 p.m. 10.30 p.m. to 12 m.

From 4.30 p.m. to 7.30 p.m. 12 m. to 1.30 p.m.

From 7.30 p.m. to 10.30 p.m. 1.30 p.m. to 2 m.

From 10.30 p.m. to 12 m. 2 m. to 3 a.m.

From 12 m. to 1.30 p.m. 3 a.m. to 4.30 p.m.

From 1.30 p.m. to 2 m. 4.30 p.m. to 7.30 p.m.

From 2 m. to 3 a.m. 7.30 p.m. to 10.30 p.m.

From 3 a.m. to 4.30 p.m. 10.30 p.m. to 12 m.

From 4.30 p.m. to 7.30 p.m. 12 m. to 1.30 p.m.

From 7.30 p.m. to 10.30 p.m. 1.30 p.m. to 2 m.

From 10.30 p.m. to 12 m. 2 m. to 3 a.m.

From 12 m. to 1.30 p.m. 3 a.m. to 4.30 p.m.

From 1.30 p.m. to 2 m. 4.30 p.m. to 7.30 p.m.

From 2 m. to 3 a.m. 7.30 p.m. to 10.30 p.m.

From 3 a.m. to 4.30 p.m. 10.30 p.m. to 12 m.

From 4.30 p.m. to 7.30 p.m. 12 m. to 1.30 p.m.

From 7.30 p.m. to 10.30 p.m. 1.30 p.m. to 2 m.

From 10.30 p.m. to 12 m. 2 m. to 3 a.m.

From 12 m. to 1.30 p.m. 3 a.m. to 4.30 p.m.

From 1.30 p.m. to 2 m. 4.30 p.m. to 7.30 p.m.

From 2 m. to 3 a.m. 7.30 p.m. to 10.30 p.m.

From 3 a.m. to 4.30 p.m. 10.30 p.m. to 12 m.

From 4.30 p.m. to 7.30 p.m. 12 m. to 1.30 p.m.

From 7.30 p.m. to 10.30 p.m. 1.30 p.m. to 2 m.

From 10.30 p.m. to 12 m. 2 m. to 3 a.m.

From 12 m. to 1.30 p.m. 3 a.m. to 4.30 p.m.

From 1.30 p.m. to 2 m. 4.30 p.m. to 7.30 p.m.

From 2 m. to 3 a.m. 7.30 p.m. to 10.30 p.m.

From 3 a.m. to 4.30 p.m. 10.30 p.m. to 12 m.

From 4.30 p.m. to 7.30 p.m. 12 m. to 1.30 p.m.

From 7.30 p.m. to 10.30 p.m. 1.30 p.m. to 2 m.

From 10.30 p.m. to 12 m. 2 m. to 3 a.m.

From 12 m. to 1.30 p.m. 3 a.m. to 4.30 p.m.

From 1.30 p.m. to 2 m. 4.30 p.m. to 7.30 p.m.

From 2 m. to 3 a.m. 7.30 p.m. to 10.30 p.m.

From 3 a.m. to 4.30 p.m. 10.30 p.m. to 12 m.

From 4.30 p.m. to 7.30 p.m. 12 m. to 1.30 p.m.

From 7.30 p.m. to 10.30 p.m. 1.30 p.m. to 2 m.

From 10.30 p.m. to 12 m. 2 m. to 3 a.m.

From 12 m. to 1.30 p.m. 3 a.m. to 4.30 p.m.

From 1.30 p.m. to 2 m. 4.30 p.m. to 7.30 p.m.

From 2 m. to 3 a.m. 7.30 p.m. to 10.30 p.m.

From 3 a.m. to 4.30 p.m. 10.30 p.m. to 12 m.

From 4.30 p.m. to 7.30 p.m. 12 m. to 1.30 p.m.

From 7.30 p.m. to 10.30 p.m. 1.30 p.m. to 2 m.

From 10.30 p.m. to 12 m. 2 m. to 3 a.m.

From 12 m. to 1.30 p.m. 3 a.m. to 4.30 p.m.

From 1.30 p.m. to 2 m. 4.30 p.m. to 7.30 p.m.

From 2 m. to 3 a.m. 7.30 p.m. to 10.30 p.m.

From 3 a.m. to 4.30 p.m. 10.30 p.m. to 12 m.

From 4.30 p.m. to 7.30 p.m. 12 m. to 1.30 p.m.

From 7.30 p.m. to 10.30 p.m. 1.30 p.m. to 2 m.

From 10.30 p.m. to 12 m. 2 m. to 3 a.m.

From 12 m. to 1.30 p.m. 3 a.m. to 4.30 p.m.

From 1.30 p.m. to 2 m. 4.30 p.m. to 7.30 p.m.

From 2 m. to 3 a.m. 7.30 p.m. to 10.30 p.m.

From 3 a.m. to 4.30 p.m. 10.30 p.m. to 12 m.

From 4.30 p.m. to 7.30 p.m. 12 m. to 1.30 p.m.

From 7.30 p.m. to 10.30 p.m. 1.30 p.m. to 2 m.

From 10.30 p.m. to 12 m. 2 m. to 3 a.m.

From 12 m. to 1.30 p.m. 3 a.m. to 4.30 p.m.

From 1.30 p.m. to 2 m. 4.30 p.m. to 7.30 p.m.

From 2 m. to 3 a.m. 7.30 p.m. to 10.30 p.m.

From 3 a.m. to 4.30 p.m. 10.30 p.m. to 12 m.

From 4.30 p.m. to 7.30 p.m. 12 m. to 1.30 p.m.

From 7.30 p.m. to 10.30 p.m. 1.30 p.m. to 2 m.

From 10.30 p.m. to 1
